

# WEARABLE & ACCESSORY SECURITY

## INTERACTIVE SECURITY FOR A BOUNDLESS USER EXPERIENCE

Get security that you would not even notice is there! Our wearable & accessory security is designed to be discreet, allowing the merchandise to be the centerpiece of the display. It also provides the customers the opportunity to interact with the merchandise. All these features while keeping the item fully secure and alarming for added protection.

## Omni Watch

Allows customers to fully interact with the watch while being protected with a security sensor.

### Sleek Display Stand

With multiple inserts and charging puck sizes, the universal stand accommodates most watches.

### Slim Sensor

Lets the customer try on the watch while protecting both the watch display and the band. If at any point, the sensor gets breached, an alarm will go off, alerting store workers.

## Quick Disconnect Sensor

The QD Sensor quickly disconnects with a security key for an untethered customer experience, and it's perfect for quick nighttime storage. A variety of accessory sensor adhesives are available to accommodate the shape of most merchandise.

## Micro Sensor

Alarm & secure the smallest accessories.

The Micro Sensor features a tamper switch and LED indicator light, confirming the merchandise is secure.

## X-Sensor

Perfectly alarm & secure merchandise with flat and rounded surfaces.

### Flex Cover

The optional flex cover fits over the X-Sensor and provides added security for merchandise located in high traffic areas.

## Cable Security Sensor

Alarm & secure wired accessories.

The LED light indicates that the merchandise is secure; the sensor will alarm if removed, and the tamper switch is triggered.

## Dual Power & Alarm Sensor

Alarm & power tablets and mobile keyboards.

### The Sensor Provides:

- Charging capabilities using a USB-C
- Power Supply
- X-Sensor to protect mobile keyboard

If the tamper switch is triggered; the alarm will sound and alert store employees.

## USB Security Sensors

Alarm & secure laptops, tablets & other devices with USB-A, USB-C, and Micro-USB security.

### Variations Available:

- Electronic and Mechanical
- Electronic Only
- Mechanical Only

If the cable is unplugged or compromised the alarm will sound.

## TITAN Watch

The TITAN Wearable Bracket offers full-metal protection for high-end watches.

This high security solution features custom-fitted, interchangeable cradles for a variety of watch faces that can alternate between our family of TITAN products.
